MANDAPATI LAYANVITA

Portfolio | layanvitam@gmail.com | GitHub | LinkedIn | +91-9966080842

CAREER OBJECTIVE

Motivated AI and ML student with a strong foundation in Python, Machine Learning, Data Science. Seeking an internship opportunity to apply technical skills in developing intelligent systems, predictive models, and AI-driven solutions using modern technologies. Eager to contribute to innovative projects while continuously strengthening problem-solving, software development, and analytical expertise.

EDUCATION

Bachelor of Technology in Computer Science — **2023 - 2027**
RVR & JC College of Engineering, Guntur, Andhra Pradesh — *CGPA: 9.64*

Intermediate in MPC - Pre-University — **2021 - 2023**
Bhashyam Junior College, Guntur, Andhra Pradesh — *CGPA: 9.70*

Secondary School Certificate — **2020 - 2021**
Sri Venkateswara Bala Kuteer, Guntur, Andhra Pradesh — *CGPA: 9.00*

INTERNSHIPS

Data Science Intern | *CodTechIT Solutions, Virtual Program | May - June 2026*

- Developed and deployed end-to-end Data Science solutions, including ETL pipelines, machine learning web applications, and business optimization models using Python, Flask, Scikit-learn, PuLP, GitHub, and Render.

Google AI/ML Virtual Program | *Eduskills - Google Developers | April - June 2025*

- Gained practical exposure to core AI/ML concepts, machine learning models, TensorFlow, and OpenCV.
- Worked on foundational machine learning and computer vision tasks, strengthening understanding of data processing, model implementation, and AI-based problem-solving techniques.

Cybersecurity Virtual Program | *Eduskills - Palo Alto Networks | January - March 2025*

- Enhanced practical skills in threat analysis, risk assessment, vulnerability assessment, firewall technologies, and cybersecurity best practices through hands-on training.
- Strengthened understanding of secure network defense, ethical cybersecurity practices, and industry-standard security principles.

PROJECTS

Object Detection Model | *TensorFlow, OpenCV, COCO, NumPy, Matplotlib*

- Designed an object detection model to identify and localize objects in images using bounding boxes.
- Used the COCO dataset for multi-class object detection and implemented image-processing and visualization techniques to display object labels and confidence scores.

Salary Intelligence Web Application | *Python, Pandas, NumPy, Scikit-learn, FastAPI, React*

- Developed a web-based application to predict estimated salaries using employee-related data.
- Analyzed factors such as age, gender, education level, job title, and years of experience.
- Implemented a Random Forest Regression model for salary prediction.
- Performed data cleaning, preprocessing, exploratory data analysis, and model evaluation.
- Integrated the Machine Learning model with a FastAPI backend and React frontend.

CONFERENCE PAPER

Context Aware Leaf Disease Detection using Self-Attention Driven ResNet Architecture
Published in IEEE Xplore, 2026 International Conference on Innovations in Computational Intelligence (ICICI)

- Enhanced feature extraction by integrating self-attention mechanisms with ResNet to capture both local disease patterns and global contextual information.
- Trained and evaluated the model on a leaf disease image dataset using accuracy, precision, recall, F1-score, and confusion matrix analysis.
- Developed an automated image classification pipeline for early plant disease identification and agricultural decision support.

TECHNICAL SKILLS

Languages	C, Python, Java
Web Technologies	HTML, CSS, JavaScript, React.js, Flask, C#.NET
Databases	SQL
Cloud & Deployment	AWS, Render

CERTIFICATIONS

- **AWS Academy Graduate - Cloud Foundations:** Accomplished training on the core AWS services EC2, S3, IAM, and VPC, together with cloud computing. Gained an understanding of cloud architecture, security concepts, storage solutions, and virtual networking.
- **NPTEL Certification - Joy of Computing using Python (Elite + Silver):** Acquired a solid understanding of Python programming concepts and enhanced the ability to write efficient, logical, and well-structured code.
- **NPTEL Certification – Programming in Java:** Completed the NPTEL course in Programming in Java, gaining knowledge of Java fundamentals, object-oriented programming (OOP), classes, objects, inheritance, exception handling, and basic programming concepts.
- **NPTEL Certification – Data Structures and Algorithms using Java:** Gained knowledge of data structures such as arrays, linked lists, stacks, queues, trees, and graphs, along with searching and sorting algorithms. Developed problem-solving skills and an understanding of algorithm efficiency using Java.
- **Quantum Computing Certification - Amaravati Quantum Valley Qubitech:** Completed training on quantum computing fundamentals including quantum bits (qubits), quantum gates, and algorithms. Resulted in upskilling foundational understanding of emerging quantum technologies.

ACHIEVEMENTS

- Selected for an internship at "**ISRO"**, recognizing strong academic and technical potential.
- Participated in the "Medhanvesh" Aptitude Test event and qualified through the first round and three sub-rounds of the final phase, demonstrating problem-solving and teamwork skills.
- Won 1st Prize in a Short Film Competition for outstanding creativity and teamwork.
- Consistently ranked among the top 10 students in academics.
- Minor in Full Stack Web Development: Learned HTML, CSS, JavaScript, XML, React.js, and MEAN Stack concepts.
